

Bird Feet

<p>Grasping Hawks, Eagles, Owls</p> 	<p>Perching Warblers, Wrens</p> 	<p>Wading Herons, Killdeer</p> 
<p>Swimming Ducks, Geese, Gulls</p> 	<p>Climbing Woodpeckers, Nuthatches</p> 	<p>Scratching Chickens, Pheasants</p> 

During your outdoor time observe some bird feet. Record the birds you see and what kind of feet they have in your journal. This can be an on-going project.

Look carefully and see how many types of feet you can find that are described in the grid.

Draw some bird feet and label with the bird's name.

Bird Feet—Advanced Study: Look up and record the information for each type of bird foot. Make a sketch or list a bird example for each foot type. List the benefits of having that kind of foot.

Bird Foot Type	Definition	Sketch or Example	Benefit
Anisodactyl			
Syndactyl			
Heterodactyl			
Zygodactyl			
Raptorial			
Palmate			
Semi-palmate			
Totipalmate			
Lobate
