

Seasonal Milkweed Study

Field Guide Notes:

Common name:

Scientific name:

Season:

Location:

Sketch Your Milkweed

Suggestions for Observation or Research

1. Plant: Cut the stem. Observe and narrate in your nature journal.
2. Leaves: Observe the arrangement and shape. Compare top and bottom sides.
3. Flower: Use instructions in Lesson 128 #4 to find the pollen sac. Use and hand-lens to observe.
4. Pod: Read the narrative section of the HNS on pods in Lesson 128. Observe and narrate.
